Subject: MS Settlement Unacceptable

Please do not accept the Microsoft Settlement, harsher penalties are in order. I am a resident of California (address below). The Settlement offered is unacceptable and I believe it actually helps Microsoft in the education market, because I am confident that a majority of the computers that would be used would be for Microsoft software. Perhaps Macintosh computers could be purchased for the schools instead. Old computers are no good anyway. My wife teaches first grade in San Jose, they need new (not old) computers. Her district only uses Macs additionally.
